

We are so grateful to each and every one of you who have stepped up to donate your time and your fish and your talents and your positivity to make CARES and our outreach projects over the years possible. From CARES for Education to Lake Victoria CARES and to this very website, it is due to your wonderful kindness and immense generosity that is inherent in this great hobby of ours that we have been able to succeed and look towards a bright future for conservation priority fish. CARES has always been about both fish and people. Together, because of you, we are making a difference!

With Warm Wishes,
Your CARES Team
