

CARES for the most part is implemented through aquarium societies and organizations. A society or organization becomes a CARES Member Club upon the first submission of data.

For further details please see [Member Club Requirements](#) and contact our [CARES Member Club Coordinator](#).

Individuals interested in being a part of CARES are highly encouraged to join a CARES Member Club to register your fish or consider implementing CARES within your home club where you can enjoy the camaraderie of others with a like mind set. In rare cases where joining a CARES Member Club is not feasible, CARES will register fish in a limited program on an individual basis.

To connect with a CARES Member Club please contact our [CARES for Individuals Coordinator](#).

We thank you so much for your participation in CARES and helping to ensure a bright future for conservation priority fish!
